

Refit of Sales & Marketing Departments Korg UK Ltd

The fast growing company Korg UK called in Space Efficient Interiors to redesign and refurbish their “pushed for space” sales and marketing department.

From early discussions with members of the Korg management team it was clear that This would be a challenging brief. Already tight for space several new members of staff had to be urgently accommodated.

After taking full survey details and undertaking a storage audit we produced plans that would increase staff accommodation by 50% making a move to larger premises unnecessary and saving thousands in extra rent for additional space.

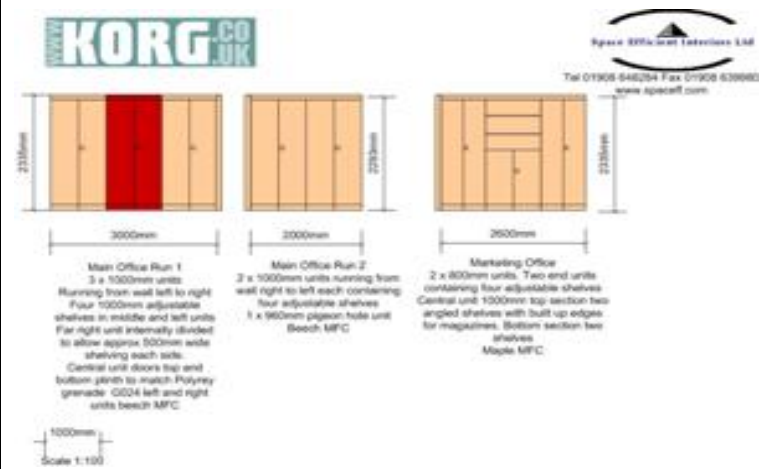

This was done by utilizing modern desking configurations, building three storagewall runs, to greatly increase storage and filing capacity and free up space being used by traditional filing cabinets.

All desks had to be equipped with individual wieland switched and fused power sockets as well as both vertical and horizontal cable management.

The project was completed on time and within budget

Cabled managed crescent desks built in cluster of four with meeting ends, CPU holders, pedestals, desk up screens and task seating.

Storagewall plans.

Increasing storage capacity and saving space
